

RIGGUARD Frequently Asked Questions:

How does the RIGGUARD attach to the truck?

In most cases the RIGGUARD will come with brackets that use the tow-hook holes on your semi truck's bumper. If you do not have tow-hook holes, the guard is mounted to the bumper and frame using the existing OEM bumper holes. In some cases slight modification is necessary for installation.

How long does it take to install my RIGGUARD?

Most RIGGUARDS will take 30 minutes to 1 hour for installation. In some cases installation may involve slight modification to the front end of the semi truck.

Does the RIGGUARD fold down so I can open my hood?

Yes. The guard can easily tilt forward 90 degrees just by removing two big grip pins.

How long will it take to receive my RIGGUARD?

Most guards are built to order and will have a lead time from 2-4 weeks depending on order quantity, lead times increase through the fall season.

What are the RIGGUARDS built out of?

We offer two different materials: 2" scheduled 40 304 Stainless Steel, or a 2" Scheduled 40 Double Wall Aluminum. Both guards are built exactly the same with 3" square tubing uprights and no seams. The pipe is run into the uprights and welded into place eliminating seams and butt-welds.

Will you guarantee my truck will have no damage if I hit a deer?

No. Even though RIGGUARD may prevent a major collision with an animal we cannot guarantee there will be no damage done to your semi truck. Feedback from our customers has shown that our RIGGUARDS have saved many companies thousands of dollars in front end repairs and costly down time.

RIGGUARD comes with a standard 1 year craftsmanship warranty.

RIGGUARD Testimonials:

"Got the guard today, and absolutely love it. You did a great job. Cannot wait to show it off. Larry said thanks for the cap. Sure like it. Your TX horse friend."

~ Carol

"The RIGGUARDS are the best purchase Bakers Supply Co. has made. The guards have saved our tractors from a lot of down time due to the drivers hitting deer and even cows! Very well made and solid not like a lot of the competitors. I will not purchase any other guard. "

~ Chad Bedora, Transportation Manager

Valley Bakers Cooperative Association, Greenville, WI

"RIGGUARD has been a wise investment for us here Blue Ridge Lumber. We have installed four of your units on Peterbilts, Macks and KW which has saved funds in the repair bills because each one of the drivers have had incidents since the installation. We have not had to replace bumpers, grills, lights, fenders and even transmission coolers since we have been using the RIGGUARDS. I suggest any driver that is traveling in an area with a lot of wildlife to invest in RIGGUARD. Our first installation was on the

KW, which the very next day struck a 150-200 black bear and there was no damage to the truck. The RIGGUARD took the hit and survived. Other tractors have had incidents and RIGGUARD withstood the damage. Good decision on our part to install. "

~ John Kingsley, Shop Foreman, Blue Ridge Lumber Inc. L.L.C.
Fishersville, VA.

"I purchased a full guard for my truck last year. I just struck a LARGE deer last night at 70 mph and the guard did a wonderful job!!!! It prevented over \$15,000.00 in damages plus down time and tow bill. Thank you very much."

~ Mark

"Thanks for the great bumper! I can hardly wait to bag my first deer! It will be a far easier, less stressful ride from Von Horn to Austin in the early morning. We typically see 100 - 200 deer on hwy 290 alone; so it's not if, it's when! Don't fear the deer, get RIGGUARD!!!! "

~ David & Shea

"I've been thrilled and proud to have a RIGGUARD deer bumper on my truck! Within two days of installation, I hit a big buck in Michigan. No Damage to bumper and very minor damage to the truck. I'm sure there would have been major fender damage without the RIGGUARD bumper! Two months later I hit another deer and no damage at all. (Where are these critters when I'm hunting?) In September my truck was parked and was hit from the left side by a trailer. The truck pushed over sideways nearly two feet! I'm sure there would have been MAJOR damage without the RIGGUARD bumper.....AGAIN! This terrific RIGGUARD bumper on my truck has paid for itself 10 times over in less than 6 months of service. I wouldn't drive without it!"

~ Ed Wesselius, Guelph, Ontario, Canada

"Mine is looking and working great!"

~ Nathan Cradle

"Got the guard today and absolutely love it. You did a great job. I cannot wait to show it off."

~ Your Tx Friend, Carol

"We travel upper Wisconsin, so deer are present all the time. One of our trucks was traveling his route and three deer ran in front of the tractor. We hit all three at the same time! We estimated 400 lbs of deer and our truck traveling at 60 mph. The damage was very minimal – work well done!"

~ Greg Knorr – Werner Electric Supply

"We have a fleet of 350 trucks. We started putting RIGGUARD on tractors and some smaller trucks over a two year period and have recorded over 100 deer collisions with NO DOWNTIME or expensive repairs. Before, one truck without RIGGUARD cost over \$8,000 in repair and three weeks downtime. Drivers don't try to avoid deer anymore, they just keep on going. Safety-wise it's better. We've now had RIGGUARD on tractors and box trucks over a five year period with no down time and very little damage; small dents, very little body damage at all."

~ Dale Schipper

"The RIGGUARD sure did its job when my tractor hit a 10 point buck! RIGGUARD saved the bumper and front end of my new Volvo tractor, plus numerous other occasions. Thanks RIGGUARD!"

~ Steve Champeau of Professional Food Systems
